Allowable Subject Matter

2. Claim 4 is allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a liquid crystal display device comprising a combination of various elements as claimed, more specifically, a plurality of semiconductor devices of a film carrier type which are disposed to lie between the liquid crystal display panel and the printed circuit board, terminals of each of the plurality of semiconductor devices being respectively connected to terminals of the printed circuit board by an anisotropic conductive film, the anisotropic conductive film being formed separately for at least each one of the semiconductor devices (see at least Figure 6).

Terasaka ('638) and Hwang ('896) disclose a liquid crystal display device comprising a liquid crystal display panel, a printed circuit board, ICs (semiconductor devices), an anisotropic conductive film. However, neither discloses the particular combination of the followings: 'a plurality of semiconductor devices of a film carrier type which are disposed to lie between the

liquid crystal display panel and the printed circuit board, terminals of each of the plurality of semiconductor devices being respectively connected to terminals of the printed circuit board by an anisotropic conductive film, the anisotropic conductive film being formed separately for at least each one of the semiconductor devices (see at least Figure 6)'.

Election/Restriction

3. An election of Group II directing to claim 4 is acknowledged. Group I directing to claims 1-3 is classified under 349/151, Group II directing to claim 4 is under 349/150, and claim 14 is classified under 349/152. These groups are patentably distinct from each other for at least reasons such as each falls under a different classification.
